**Villages :**

**Banjar Cluster**

Khisi  
Samaiya  
Dhamangaon  
Batwar  
Bhagpur

**Budbudi Cluster**

Sautiya  
Chapri  
Kutwahi  
Manegaon  
Patpara

**Total population of these villages:** 3,600 approximately

Satpuda Foundation's conservation philosophy focuses on communities living in and around protected areas. The Foundation believes that these communities need to be roped in as allies in the conservation movement and that long-term, sustainable conservation is not possible only through the action of outsiders.

As part of this strategy, the Foundation follows a multi-pronged strategy of trust-building activities with communities, assisting them in meeting some of their basic needs, building their capacities and training and equipping them to shift to a lifestyle which is not based entirely on forests and forest produce.

Towards this end, the Foundation

- helps organise medical camps in which villagers get free medical treatment and medicines
- undertakes education programmes focusing on nature and wildlife conservation
- acts as a bridge between the villagers and development agencies in solving local development needs and
- assists villagers in getting gainful, legal employment and also organizes training programmes which help equip unemployed villagers with skills which will help them either get jobs or start their own small businesses

### ***Highlights of our activities in 2011-2012***

## Conservation activities

### ***Water Conservation***

The Foundation organises programmes involving local villagers and school children to build temporary structures known as check dams/stop dams which help to retain water and to recharge water table of the adjoining areas. These structures are typically built on streams, known as nallahs, and are selected with the help of local forest officials and villagers.

In addition, we also help build soak pits next to wells/hand pumps. These soak pits collect the water which is spilt while being drawn from the hand pump or well and help to recharge the water table. Our team also promotes rainwater harvesting.

### ***Fire fighting***

Each year, our teams assist in preventing fires, fighting fires, which are very common in the dry, deciduous forests of this region. We start with awareness programmes from the spring months onwards and then extend our efforts to physically fighting the fires, which typically occur during the summer months.

### ***Patrolling/cleaning of waterholes***

Our staff voluntarily joins hands with local forest officials in anti-poaching patrols and help in cleaning waterholes meant for wildlife.

### ***Organic farming***

We promote organic farming through the use of compost/vermi-compost as part of our focus to reduce the impact of chemicals on areas adjoining prime wildlife areas.

A list of our conservation activities is given in **Annexure 1**. Detailed monthly reports are available on our Web site [www.satpuda.org](http://www.satpuda.org)

In May, we conducted awareness programmes about smokeless chullahs or stoves. These stoves will result in lower smoke and will also require less wood for burning. Ajeewika, a MP government agency for rural livelihoods, will provide some material assistance to the villagers in making these stoves. Along with Ajeewika, we selected 4 women, 2 each from Manegaon and Chapri, to attend a training programme on smokeless chullahs at Nainpur. The programme was funded by Ajeewika. These women, on their return, trained local villagers in making the smokeless chullahs. A total of around 150 such chullahs have been made so far in Manegaon, Patpara, Sautiya and Chapri.

During July, our team also organised two day-long workshops on environment education for village schools. The workshops were organised jointly with Ajeewika, a MP government agency which focuses on rural livelihood. The workshops included drawing competitions, nature quiz, visits to bio-gas and vermi-compost units and conservation rallies. The first workshop was on July 28 at Manegaon and included schools from Manegaon and Patpara.

The second was on July 30 at Chapri and the schools were from Kutwahi, Sautiya and Chapri.

In September, our team had organised a number of meetings to explain to villagers how they could undertake vegetable farming on a commercial scale as there was ready demand for fresh vegetables from resorts around Kanha.

In October, we followed up on this programme by distributing vegetable seeds to 11 villagers from seven villages as a pilot project. We will monitor the progress of the

villagers and assist them as required. The vegetables included chilly, cauliflower, spinach. The villagers are:
