**Total population of these villages: 8,500 approximately**

*Medical camps are supported by Born Free Foundation.*

Satpuda Foundation's conservation philosophy focuses on communities living in and around protected areas. The Foundation believes that these communities need to be roped in as allies in the conservation movement and that long-term, sustainable conservation is not possible only through the action of outsiders.

As part of this strategy, the Foundation follows a multi-pronged strategy of trust-building activities with communities, assisting them in meeting some of their basic needs, building their capacities and training and equipping them to shift to a lifestyle which is not based entirely on forests and forest produce.

Towards this end, the Foundation

- helps organise medical camps in which villagers get free medical treatment and medicines
- undertakes education programmes focusing on nature and wildlife conservation
- acts as a bridge between the villagers and development agencies in solving local development needs and
- assists villagers in getting gainful, legal employment and also organizes training programmes which help equip unemployed villagers with skills which will help them either get jobs or start their own small businesses

### ***Highlights of our activities in 2012-2013 (April-March)***

## **Conservation activities**

### ***Water Conservation***

The Foundation organises programmes involving local villagers and school children to build temporary structures known as check dams/stop dams which help to retain water and to recharge water table of the adjoining areas. These structures are typically built on streams, known as nallahs, and are selected with the help of local forest officials and villagers.

In addition, we also help build soak pits next to wells/hand pumps. These soak pits collect the water which is spilt while being drawn from the hand pump or well and help to recharge the water table.

### ***Fire fighting***

Each year, our teams assist in preventing fires, fighting fires, which are very common in the dry, deciduous forests of this region. We start with awareness programmes from the spring months onwards and then extend our efforts to physically fighting the fires, which typically occur during the summer months.

### ***Patrolling/cleaning of waterholes***

Our staff voluntarily joins hands with local forest officials in anti-poaching patrols and help in cleaning waterholes meant for wildlife.

### ***Anti-plastic campaigns***

We regularly conduct anti-plastic campaigns where we explain to the villagers the harmful effect of excessive use of plastic and polythene and the need to clear up the environment of such litter.

### ***Plantation programme***

We undertake regular plantation of saplings during the monsoon months and organise follow-ups in subsequent months.
