

Course Objective and Outcomes

Wildlife Conservation means different things to different people and there are several approaches to achieving it. What was earlier considered the domain of Government Officials is truly turning out to be a multi-dimensional domain requiring the involvement of several stakeholders. Each of us can play a pivotal role to ensure continued survival of our wildlife (be it tigers, gharials, wolves or just the forest). This intense certificate course will attempt to expose to-be conservationists with the problems & possible methods of achieving the field conservation.

COURSE EXPERTS

Mr. Kishor Rithe

Mr. Debi Goenka

Dr Nishikant Kale

Kirti Chavan

Sarang Mishrikotkar

Mandar Pingle
